Date (desc)	11/21/2016	11/15/2016	11/14/2016	11/11/2016	11/9/2016	11/4/2016	11/2/2016	10/31/2016
Highlights /Impediments	**Deployed code:** http://ven-dev-gsaapp1/#/dashboard Most of the team will be OOO from Weds 11/23 - 11/25 for Thanksgiving break; Sprint 2 planning is on Tuesday 11/22; **Pending**: Still waiting on what fields are read-only; Users / permissions;	**Dev team met about unit testing; Adding tasks to User Story cards: Please check off items that have been completed;** **Pending**: Still waiting on what fields are read-only; Users / permissions;	**No Impediments.**	**Impediment**: DB hookup **Pending**: LDAP meeting;	**Impediment**: Matt/Steph needs Database load so they could test the items they've completed so far; **Pending** issues: LDAP; Cost Model (meeting on Thurs);	• Make sure to create a pull request when committing to master • Finalize and send DB a Master Data list • Development is on a good track. Great work Team!	• Dev Team: Converting mockups to HTML and getting framework in place ▪ Planning to meet again today • Waffle.io → Now working as expected • Creating UI dev branch on GIT by COB	• Technical Team: Team met last Thursday to discuss details and will meet again today 10/31 to discuss development plan, task order and begin Dev. Sai A- Will send plan by COB • LOE's: Received from Matt R and Adam. Sara, Justin, and Stephanie to complete by COB. Please update GIT Issues (User Stories) with LOES in the comments field. • Reviewed GitHub/Waffle responsibilities • Basic Capacity Planning • Security Clearance Documents- Complete by COB 10/31/16 • LDAP account structure questions from Tech side- will discuss with Ray for next steps.
Matt	UI/Front-end portion of add new data center # 39 should be complete. #7, 15, 16 you listed should also be good on the UI/Front-end. I performed a pull request and merge on the working branch and opened a pull request for Sai to code review and merge changes from working into stable. Onto the dashboard (#22) now!	- Put in config for front end testing; initial test not working yet;	- Pull request for #15 create quarter page; not connected to backend yet;	- Working on 15 &16; hoping to do a pull request by this afternoon; - Question: Regions TBD; meantime will use regions 1-11; - No impediments	Working on Data Fields - Modal to add new Data Center; Move #7 & #8 into Dev In Progress;	• Met w/ Adam • Create quarter/HTML tied in with Angular • Working on 'actions'	• Framework and HTML conversion in progress	• Created GIT Projects • Was able to deploy DHS flash project locally for team reference – can support team questions around this.
Stephanie	- Working with Ryan to get jar for DB set up #45; Make another commit on #45 today; - Once commit is done, quarter data will be populated and Matt & Steph can start testing completed items;	- Finishing connection with DB side; categorizing objects for UI form;	- Complete connection to DB; work with matt to hook up front end; - Get 15, 16 to CR tomorrow; - Encryption for DB - work on it tonight with Sai;	- Working on 15, 16, 17; - Not comfortable calling things done until they're connected to DB; - Will continue to commit to branch;	Pushed code into own branch so far; Will have working session with Matt to wrap a few things up tonight;	• Starting Development today, initial setups taken care of. • Workspace impediments … working with Sai to fix	• Framework and HTML conversion in progress	• Touch base with Matt today and will get LOE's completed after lunch.
Adam	- wrapped up my piece on the new quarter process; - Will assign data centers to region for now - could change later.	- Waiting on GSA's determination of read-only vs editable fields for users; - User permissions?	- Close #25; - I'm just wrapping up some questions regarding data consistency and the audit trail table structure	- Will commit changes to Data Model based on yesterday's meeting with Vern by today;	Finished Data Model; Working off Sara's datasheet and mockups; Meeting with Matt/Steph to work out Calculated fields; Will complete Data load by EOD - #25;	• Data model almost complete • Moving onto infrastructure for auditing triggers • Impediment- Get a complete list of fields- master fields	• We've finalized the structure of the data model and work has begun to create the database. • The main issue I'm having is knowing what fields we need for day forward reports and what columns should be segregated as historical data.	• Adam working with Divakar for initial setup.
Sara	Updating CSS - no major work;	No Updates;	- Help out with front end where needed; - Making some minor updates to mockups/front-end; - Add responsiveness classes;	- Updated form fields to Matt; - Completed workflow diagram on github; - Will make on UI changes on frontend as needed;	Data Fields sheet is complete; Will update workflow diagram; Working with Matt to see if he needs help with HTML for pages;	• Touch base with Matt regarding some mockup questions. • Working to merge work with Justins • Work w/ Khanh and Nick to create master field list	• Uploading Mockups to GIT by COB	• Finishing up Mockups and working with Dev Team to begin work.
Justin	No updates;	No Updates;	- Done with all expected delivery for S1;	- Enhancing Advanced Search pages; - Continue with mockups;	Finished Advanced Search Criteria mockup;	• Created UI dev branch / committing work before Sara merges with hers. • Login screens completed	• Uploading Mockups to GIT by COB	• Finishing up Mockups and working with Dev Team to begin work.
Ryan	- Displaying badges for waffle and codeclimate on github; - Uploaded SonarQube pdf to github;	- Made Github public; - Work with dave on Coveralls?	- No updates;	- Created branch - helping with Sai A. whenever dev team needs; - Ready to make deployments when ready; - Github will be public over weekend;	Need a CICD Config story (created.); Will work with Sai to set up branch to start CR on all ready items from separate branches;	• Git Update • OOO until Weds 11/09	No updates	• No updates
Dave	- Working with Ryan to get things set up integ with Github/codeclimate/coverall; revoked admin user and create diff user to restrict access; - SonarQube config - continued; Working on System Arch document for Ray; No impediments;	No Updates	- Sent Ray sample docs for architecture for review; - Working on setting up users within SONARQube - pass to Ryan; - Work on config;	- Jenkins configured to use active dir (only Ryan & Dave has access) - TO DO: add Steph, Matt, and Sai to have access to kick off builds; - Installed SONARQ (#28) - working with Ryan to configure it;	No Updates;	• Servers nearly complete • Getting login information to Sai • SQL server installed • CICD server get Sonar installed.	No updates	• No updates
Khanh/Nick	- Talked to Mathew/Vern re: data center & staff updates; - Requested Mathew to schedule for Sprint 1 demo; - Will be preparing for Sprint 1 demo;	No Updates	Nick: Setting up a meeting for LDAP and SSO to have the conversation weds or thurs; just need to check with Sai and Praveen for the best times; Khanh: work on S2 stories; update #22; Waiting for Mathew/Vern to send matrix of SO v. Data Center ID	- Met with Vern to talk about some questions and Cost Model yesterday; - Gathering remaining questions to send to GSA; - Contact for LDAP - Nick swill set up meeting with Mark Pratt on Tuesday next week;	No Updates;	• Reach out to Vern for Cost Analysis • Planning for Sprint 2 • Follow up with Justin • Follow up with Adam • Follow up regarding hours and clearances	• Setting up in-person meeting with Vern for Cost Analysis • Planning for Sprint 2 • Updating GIT/Waffle and finalizing Capacity planning based off LOE's received. • Reviewing Waffle.io board process and finalizing details to be used → discussion on breaking down user stories to more detailed tasks/explanations w/ Ray o Access to other Ventera Repos for examples	• Setting up in-person meeting with Vern for Cost Analysis • Planning for Sprint 2 • Updating GIT/Waffle and finalizing Capacity planning based off LOE's received by COB.
Support Team	- No updates;	Sai: code reviewed Matt's items - initial	None;	Sai - PTO Ray -wikipedia pages	Sai: Has some items to start code review;	Sai: LDAP question- touch base with		Sai: Held Tech Team meeting last Thursday, will host another today

		code changes and UI looks fine but have some items to standardize;		to show the GSA regions & names		Ray.		to plan out task order and review development plan.
